## **BOOK SYNOPSIS**

What can parents do to help their youngest children in their task of self-formation? How does the Montessori method of hands-on learning and self-discovery relate to the youngest infants? This authoritative and accessible book answers these and many other questions. Based on Dr. Maria Montessoris instructions for raising infants, its comprehensive exploration of the first three years incorporates the furnishings and tools she created for the care and comfort of babies. From the design of the babys bedroom to the child-sized kitchen table, from diet and food preparation to clothing and movement, the authors provide guidance for the establishment of a beautiful and serviceable environment for babies and very young children. They introduce concepts and tasks, taking into account childrens sensitive periods for learning such skills as dressing themselves, food preparation, and toilet training. Brimming with anecdote and encouragement, and written in a clear, engaging style, Montessori from the Start is a practical and useful guide to raising calm, competent, and confident children.
